LEARNING OBJECTIVES:

At the completion of this lecture, participants will:

- Increase their understanding of public health trends, including COVID-19, flu, RSV, etc. cases, including impact on physician practices and hospitalization rates.
- Collaborate with colleagues and local experts on latest testing, treatment and vaccine development of COVID-19 and other public health-related diagnosis.
- Implement evidence-based practices as shared by primary care, specialists, intensivists, infectious disease physicians for general and special patient populations.
- Increase awareness and discuss opportunities for collaboration regarding local public health resources, community education and action plans, and create opportunities for broader public health management.
